

1. Yes, Kartik Poramanik is an inspiration for us due to his nature loving work. Kartik Poramanik is a hair dresser by profession. His passion is to plant saplings which grow into gigantic trees. He started planting trees at the age of 10. He started his mission remembering his father's quotation "You can earn the blessing of God by planting trees." Kartik Poramanik has planted hundreds of trees in his village. Kartik hardly found trees in his village to take shelter. So he started planting trees. Kartik has planted trees beside roads, in and around the bazar, school, colleges and many other places.

He would water on the trees at 10 or 11 PM after earning money for his family. Even today this 63 year old man continues planting trees as many as he can. So we can certainly say that Kartik Poramanik is inspiration for us.

2. "The truthful dove" is the suitable title for the story because of her truthfulness. The dove thanked the owl for the shelter and food. She was also grateful to the owl for this. But the bat and owl show their heartlessness. The two heartless creatures fell upon the little dove and drove her out into the dark and stormy night. But the owl and the bat did not go unpunished for their act of heartlessness. The bat can never fly in the sky in broad daylight. The owl is blind as long as the Sun is up. He cannot hunt or feed himself unless it is dark.

On the other hand the dove is rewarded for her truthfulness. Her name will be used by poets as long as the world lasts to rhyme with "LOVE".
So "The truthful dove" is the suitable title for the story.

Boat-School

River gypsies are people who travel from one place to another. They use boats to roam in the river. The river gypsies are an integral part of our history and culture. There is a boat-school in my area. We teach the river gypsy children. It is a matter of sorrow that gypsy children do not get proper education. They are deprived of this basic right. In my area, we have a boat school.

Boat school is an important and effective initiative in this regard. We go to the gypsy families and ask them to bring their children to the school. We have got some children who are interested in learning. We have some plans for them. We have decided that we will provide them the basic textbooks of school for free. Thus, we can start from the beginning and teach them the basics of Bangla, English, Mathematics and other important subjects. This knowledge will help them to lead their life in a better way.

We can also teach them the use of computer and other available technologies. Today people with poor technical skill cannot prosper in life. We can take our laptops and show them what Technology can do. We will also teach them their uses. We can also teach them about morals and humanity.

Gypsy children deserve the chance to shine in life. They need our help and we should do our best to help them.
